SITEPROTECT Lockdown Alarm Control Panel — Part Number: CYGLDAP02

Control Panel (50 networked devices)

The SITEPROTECT Lockdown alarm system has been developed primarily for the education market to protect and warn of an intruder or other critical event.

The system comprises of a control panel and remote devices that connect to each other through a wireless mesh network.

Alarm devices can be located in each teaching area, so when the alarm is activated the staff and pupils will follow the lockdown procedure.

An alarm device also has a call point which can be activated by the staff member in any area just like a fire call point system.

The lockdown alarm control panel is an optional element to notify a responsible person of an active alarm, to quickly identify the location of the activation and alert the authorities.

The system can be interfaced with the premises public address system using a SITEPROTECT Input/Output device (CYGIOU).

Further features can be added such as GSM notifications using an Autodialler (AUTODI07-C) which can communicate an emergency to up to 50 users.

Technical Specification	CYGLDAP02
Size H x W x D (mm)	320 x 285 x 135
Rechargeable Battery Backup	15 days* battery back up
Aerial Height (mm)	230
Weight (KG [lbs.])	4.68 [10.30]
IP Rated	IPX0
Frequency	868MHz
Receiver Category	Category 1
Noise Level (dBA)	85
Power	6VDC
Aerial Type	External Mount
Warranty	12 Months

*24 hours when linked with an autodialler

Doc Number. 4001-DTS-0012
Issue Number. V0.2 25-09-2025
