SITEPROTECT Repeater Unit | Part Number: CYGRU

Repeater Unit with PIR capability

The SITEPROTECT Wireless Alarm System, manufactured by Bull Products, sets the benchmark in innovation in wireless emergency fire, first aid and intruder alarms for construction sites. Designed for performance and reliability and utilising patented Cygnus technology to power the devices, SITEPROTECT is the most adaptable temporary mesh fire alarm system for use in the construction industry.

The SITEPROTECT Repeater Unit is designed specifically to extend the communication range of the fire detection system, ensuring reliable signal transmission for expansive or complex sites that require additional range.

It is ideal for large-scale environments where fire points may be widely spread.
