

FIRST RESPONDER STATIONS

All-in-one solution for your site

FIRST RESPONDER STATIONS

Our First Responder Stations are trolley-based mobile units that have been designed to create a clear, centralised emergency response point across site for fire safety, spill control and first aid.

They are available in four standard options, Fire Safety, First Aid, Spill Control and Lithium Ion Fire Safety.

FIRST  **RESPONDER**
FIRE SAFETY STATION

FIRST  **RESPONDER**
FIRST AID STATION

FIRST  **RESPONDER**
SPILL CONTROL STATION

FIRST  **RESPONDER**
LITHIUM STATION

Customisation

The Bull Products range of First Responder Stations are designed to suit all requirements. As well as the standard configurations, these stations are also fully customisable. You can build your own First Responder Station with customised signage, emergency plans, extinguishers, alarm type, cabinet type, company branding, etc.

FIRST RESPONDER

FIRE SAFETY STATION

The Fire First Responder Station is the first responder's central point for fire safety equipment and alarm.

- Improves emergency response times
- Instantly alerts designated personnel when accessed
- Helps protect equipment from theft, misuse, and weather damage
- Provides clear visibility and easy access to fire safety equipment
- Mobile design allows flexible positioning across site

FIRST RESPONDER

LITHIUM STATION

The Lithium Fire First Responder Station is the first responder's central point for fire safety equipment designed to support safer management of the growing risks associated with lithium-ion battery fires.

- Provides rapid access to specialist lithium fire protection equipment
- Helps improve response times during battery fire incidents
- Protects equipment from misuse and tampering
- Improves visibility and accessibility of emergency fire safety equipment
- Mobile design allows flexible positioning across site
- Optional alarm and protective equipment available for enhanced safety

FIRST RESPONDER

FIRST AID STATION

The First Aid First Responder Station has been designed to overcome the challenges of maintaining adequate first aid equipment on-site.

- Enables fast access to first aid equipment in emergencies
- Helps maintain stocked, protected, and organised first aid supplies
- Instantly alerts personnel when the station is accessed
- Improves visibility and accessibility across site
- Mobile design allows flexible positioning in changing work environments
- Supports safer, more compliant workplaces

FIRST RESPONDER

SPILL CONTROL STATION

The Spill Control First Responder station is the first responder's central point for oil, maintenance and chemical spill equipment.

- Enables fast response to oil spills and leaks
- Helps keep absorbents protected from misuse, damage, and contamination
- Improves visibility and accessibility of spill response equipment
- Mobile design allows flexible positioning across site
- Supports cleaner, safer, and more compliant working environments
